Contributions:

Alejandro Balderas (25%)
- ○ Create Group and Group Browser functionality

Pamela Vazquez De La Cruz (25%)
- ○ Event Creation functionality

Rodrigo Estrella (25%)
- ○ Login and Signup functionality

Daniela Torres Martinez (25%)
- ○ Overall UI: loading screen and storyboard

Deviations:
- ○ Planned to implement the Reminder Creation Page, but we ended up focusing more on Events. The creation of Reminders should be really straightforward after this, we will be using either an action list or a seg control to reuse most of the same data as Event creation.
- ○ Planned to implement Friend List, but we have to wait until the user can search add friends
- ○ Instead of these, we ended up creating the Navigation Bar and all the UI for the project.
